COVID impact on preprints

<https://www.science.org/content/article/completely-new-culture-doing-research-coronavirus-outbreak-changes-how-scientists>

Information revolution

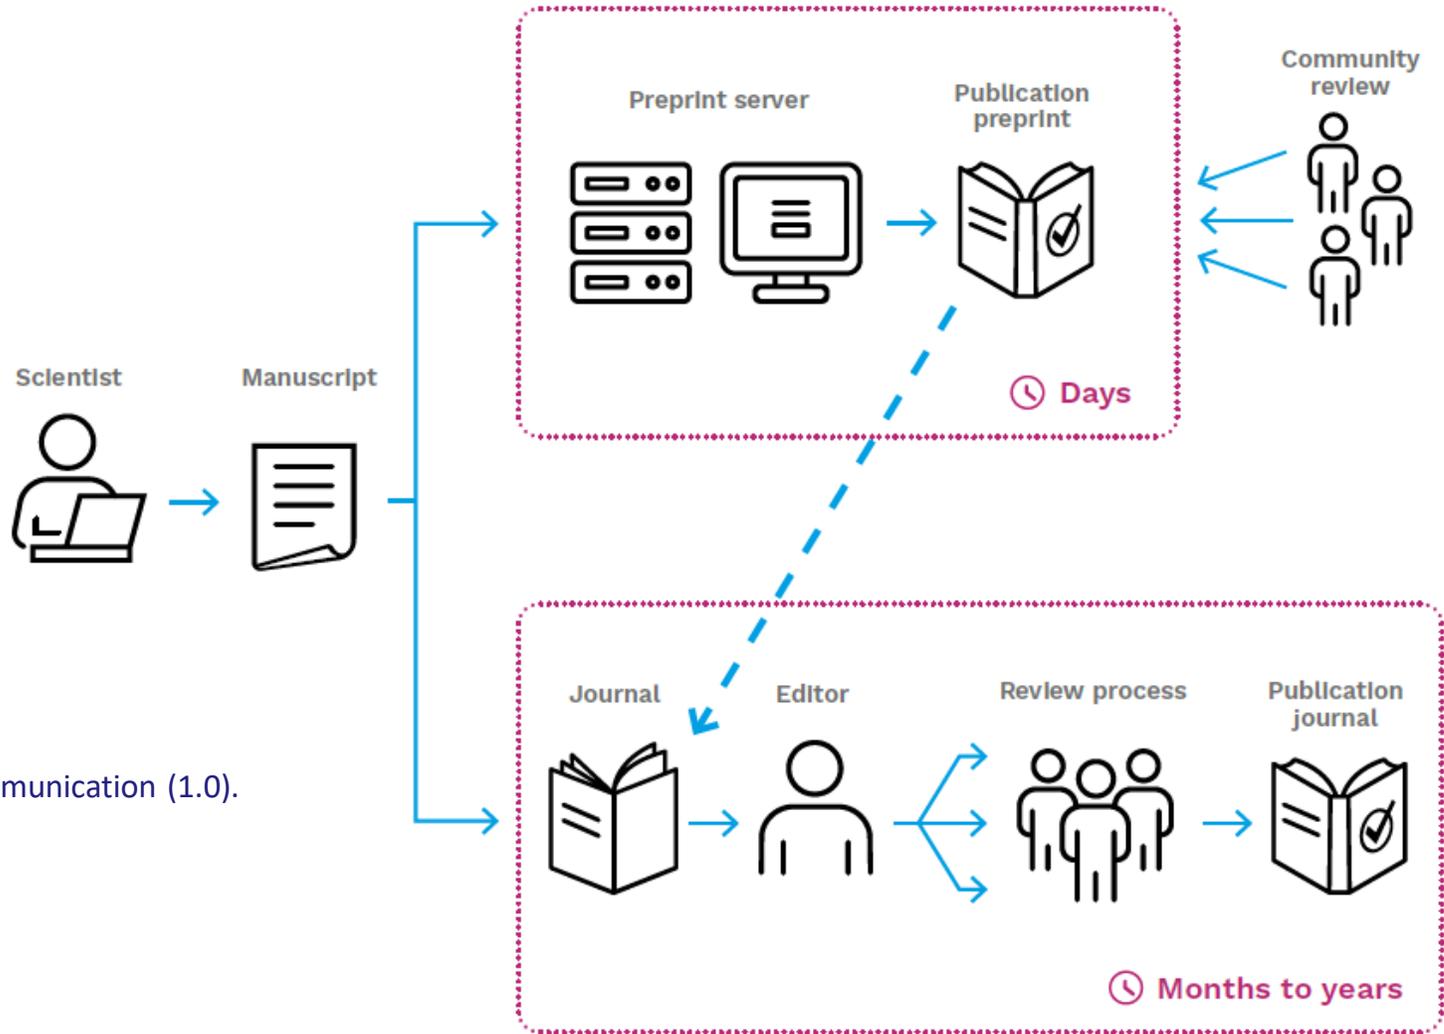

Scientists are sharing more information using preprints than they did during any previous outbreak. The number of published papers is exploding as well.

Preprints pros & cons

Sharing preprints

This course shows you how sharing preprints can improve your research and support Open Science. By the end of the course, you will:

- know what preprints are
- be able t...

<https://www.fosteropenscience.eu/learning/sharing-preprints>

Pros

Click the plus sign to expand the text box.

- + Faster dissemination of results
- + Establishing primacy
- + Preprint publishing fosters open science
- + Evidence of productivity and accomplishment
- + Increased visibility of your emerging research increases potential dissemination channels
- + Feedback on your work and potential for improvements, enhanced quality
- + Establishing priority of discoveries and ideas
- + Potential for developing new collaborations earlier
- + OA to your work across the globe

Cons

Click the plus sign to expand the text box.

- + Not all journals accept papers that have been submitted to a preprint server
- + Risk of 'preprint wars'
- + Risk of embargo violations
- + Poor quality and irreproducible data will be posted in preprint form
- + Scientists will rush out data prematurely to claim priority and get credit
- + Scientists will try to "scoop my work" if I post as a preprint

Preprints publishing commons

- ✓ articles are **not peer-reviewed, edited, or typeset** before being posted online
- ✓ articles undergo a **basic screening process** for offensive and/or non-scientific content and checked for plagiarism
- ✓ an article should **not** be posted if it has already been accepted for publication by a journal
- ✓ once posted, **articles are citable** and cannot be removed
- ✓ Authors **retain the copyright** and license their articles (e.g. CC-BY)
- ✓ Authors **authorize text mining** (by browsers or other researchers)

Where to check if a publisher/ journal accepts

THE PREPRINT SERVER FOR BIOLOGY

The logo for SOC ARXIV, with "SOC" above "ARXIV" in white text on a red square background.The logo for PsyArXiv, featuring a red square with the Greek letter Psi (Ψ) above two red squares containing the letters "A" and "X", with "PsyArXiv" written below.The logo for OSF PREPRINTS, with a blue circular icon of dots to the left of the text "OSF PREPRINTS" in white and blue on a dark blue background.

Directory of Open Access Preprint Repositories

[Home](#) [Repositories](#) [Functions](#) [Disciplines](#) [Integrated Services](#) [Feedback](#)

[FAQ](#)

It is becoming an increasingly common practice for researchers to share their preprints because it allows them to disseminate their research results quickly and openly with the rest of the world. As a result, there is a growing number of preprint-specific and generalist repositories that support the sharing of preprints.

This directory provides a list of preprint repositories that are available to the research community. It helps researchers find the most appropriate platform for them, enabling them to browse through existing repositories by discipline, location, language, functionalities, and other facets.

The directory is jointly managed by [Centre pour la Communication Scientifique Directe \(CCSD\)](#) and [Confederation of Open Access Repositories \(COAR\)](#). The data in this directory was originally compiled through the GPPdP (Groupe Projet Plateformes de Prepublications) project, with financial support from the French [Ministry of Research's Open Science Committee \(CoSQ\)](#).

To suggest a new repository, or provide feedback on a repository already included in this directory, please see the [feedback page](#).

The logo for COAR, with "CO" in green, a black circle with green dots in the middle, and "AR" in green.The logo for CCSD, with "CCSD" in blue and three colored dots (red, green, blue) to the right, followed by the text "Centre pour la Communication Scientifique Directe" in black.

- [Gateways & Collections](#)
- [How to Publish](#)
- [About](#)
- [Resource Hub](#)
- [Blog](#)

Rapid & Transparent Publishing

Fast publication and open peer review for research stemming from Horizon 2020, Horizon Europe and Euratom funding across all subject areas.

[Submit your research](#)

Gateways

- [Gateways](#)
- [Community Gateways](#)
- [Collections](#)

Gateways provide dedicated portals for the different funding programmes, programme areas and their thematic sections. In each gateway, you will find articles published on Open Research Europe that are linked to projects funded under each funding.

COST Actions

This gateway hosts the articles published on Open Research Europe stemming from COST Actions.

Euratom

This gateway hosts the articles published on Open Research Europe stemming from Euratom supported by Horizon 2020 and Horizon Europe.

European Research Council (ERC)

The European Research Council supports frontier research, cross disciplinary proposals and pioneering ideas in new and emerging fields which introduce unconventional and innovative approaches. This gateway hosts the articles stemming from ERC funded projects.

H2020

Horizon 2020

Horizon 2020 was the EU's research and innovation funding programme from 2014-2020. This Gateway hosts the articles published on Open Research Europe that were funded by Horizon 2020.

HE

Horizon Europe

Horizon Europe is the EU's current key funding programme for research and innovation. This Gateway hosts published articles on Open Research Europe that we funded by Horizon Europe.

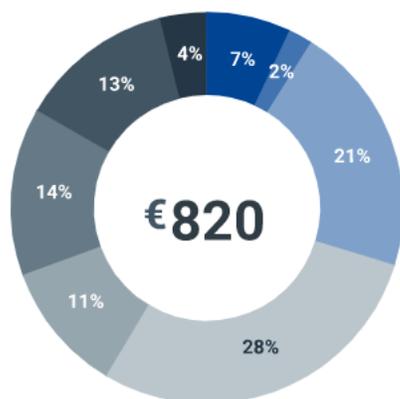

Marie-Sklodowska-Curie Actions (MSCA)

The Marie Skłodowska-Curie actions (MSCA) provide grants for all stages of researchers' careers and encourage transnational, intersectoral and interdisciplinary mobility. This gateway hosts the articles stemming from MSCA funded projects.

Pre-publication checks to publication	28%
Services after publication	11%
Platform development	14%
Marketing and business development	13%
Author and user support	4%

Publishing process

Article Submission

Submission is via a single-page submission system. The in-house editorial team carries out a comprehensive set of prepublication checks to ensure that all policies and ethical guidelines are adhered to.

Publication & Data Deposition

Once the article has passed the prepublication checks, a fully typeset version is published with a DOI, enabling immediate viewing and citation, as well as indexing in Google Scholar. Once the article is published, it cannot be sent to another journal for publication.

Open Peer Review & Article Revision

Expert reviewers are selected and invited, and their reviews and names are published alongside the article, together with the authors' responses and comments from registered users. Authors are encouraged to publish revised versions of their article. All versions of an article are linked and independently citable.

Send to Indexers & Repositories

Articles that pass peer review are sent to major indexing databases and repositories.

Support

Submit your Research

Articles are published rapidly as soon as they are accepted, after passing a series of prepublication checks to assess originality, readability, author eligibility, and compliance with Open Research Europe's policies and ethical guidelines. Peer review by invited experts, suggested by the authors, takes place openly after publication. An article remains published regardless of the reviewers' reports.

Authors are encouraged to respond openly to the peer review reports, which are published with the article, and can publish revised versions of their article, if they wish. [Read more](#) about Open Research Europe's peer review model.

See the [Article Guidelines](#) for information about submitting different article types. Track your submissions via [My Account](#).

Article Guidelines

Open Research Europe is an open access publishing platform for the publication of research stemming from Horizon 2020, Horizon Europe and Euratom funding across all subject areas. The platform makes it easy for Horizon 2020, Horizon Europe and Euratom beneficiaries to comply with the open access terms of their funding and offers researchers a publishing venue to share their results and insights rapidly and facilitate open, constructive research discussion.

At least one author must be involved in a running or finished Horizon 2020, Horizon Europe or Euratom project from the European Commission and the article must be a result of that project.

Open Research Europe publishes articles across the Natural Sciences, Engineering and Technology, Medical Sciences, Agricultural Sciences, Social Sciences and Humanities. Please see below for the relevant article guidelines for Social Sciences, Humanities, and Science, Technology and Medicine subjects.

Please read our [publishing policies](#) for all subject areas on Open Research Europe.
